

# Kaizen Workshops

The Kaizen Workshop, or kaizen blitz as it is often called, is the most often used lean implementation tool. It is highly effective in achieving significant measurable results in a very short time.

The literal translation of kaizen is “small improvements everyday” and the approach is simple. Define the problem/opportunity, pick the best cross-functional group of people, and fix the process or problem quickly using lean tools and techniques.

Key kaizen practices and principles include:

- Just do it

- Creativity before capital
- Work on the “Gemba” (work in the real place, on the real thing, with the real facts)
- Problem-solving tools and structure
- Rapid decision-making

What distinguishes Lean Learning Center Kaizen Workshops from others? First, our passion for understanding your current state via process-mapping. Second, our focus on the ideal state to help you achieve breakthrough results – not just incremental improvement.
